KitLock by Codelocks

KitLock KL3 Mechanical

Designed with simplicity in mind, the KL3 offers mechanical keyless access suitable for a variety of lockers, cabinets and cupboards.

A durable, compact, easy to use mechanical locker lock. Designed to be both retrofitted or installed on new cabinets. This offers the benefits of a combination lock with the ability to have a code finder key should the user forget the code. This is where the KL3 comes in, as it offers both exceptional value and the practicality of the 3 wheel code combination, with additional code finder key. The applications are but not exclusive to offices, schools, dedicated lockers in warehouses, gyms, colleges etc.

Easy to install | Mechanical keyless access | One year guarantee* | Private Functions

Lock Models

Private Function
The KL3 Private Function is ideal for use where the same, personal 3 digit code will be repeatedly used, e.g. an employee with the same locker/drawer in the workplace.

Code Retrieval
This function requires the Master Key (sold separately). Allows a code to be retrieved should it be forgotten or emergency access is required.
