KL10
Simple Mechanical KitLock

Introducing the KitLock KL10. Designed with simplicity in mind, the KL10 offers mechanical keyless access suitable for a variety of lockers, cabinets and cupboards.

A durable, compact, easy to use mechanical lock. Designed to be both retrofitted or installed on new cabinets. Changing or resetting the code can be completed easily whilst the lock is still on the door, or if the code has been forgotten it can be retrieved using the Master Key.

- Code retrieval function
- Master Key available separately
- Suitable for internal use only
- 44.7mm ($1^{3}/_{4}$") straight cam and 50mm (2") crank cam supplied with retail boxed product

FUNCTIONS

Private Function
The KL10 Private Function is ideal for use where the same, personal 4 digit code will be repeatedly used, e.g. an employee with the same locker/drawer in the workplace.

Public Function
The KL10 Public Function is ideal for short term, multiple occupancy applications. The user enters a personal four digit code, this locks the lock. The same code is entered once only to open the lock, the lock remains open ready for the next user.

Code Retrieval
This function requires the Master Key (sold separately). Allows a code to be retrieved should it be forgotten or emergency access is required.

KitLock by Codelocks

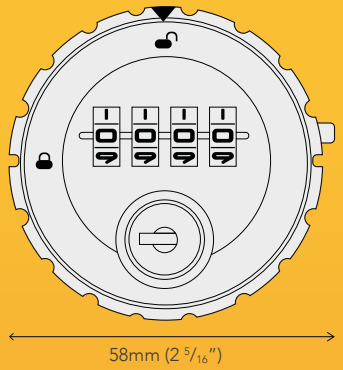

KitLock by Codelocks is a convenient and stylish alternative to traditional key-operated locker locks. Cabinets and lockers in any setting including gyms, leisure centres, schools, hospitals and offices can be opened using a code, eliminating the inconvenience of coins and keys.

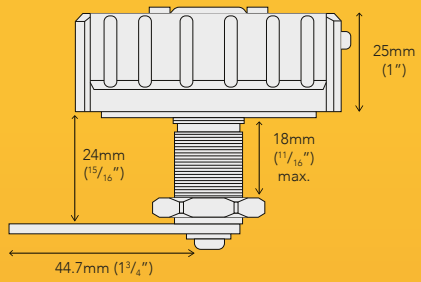

Fixing Pack
The KL10 is provided with a straight cam, hex nut, cranked cam, metal clip, washer and three screws as standard.
