SECUPRO MAXISAFE
NO. 101806

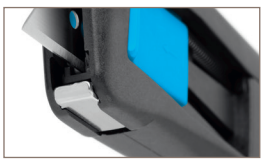

Original size

3-sided slider
With the right hand? With the left hand? From the top? Regardless of how you wish to activate the blade, SECUPRO MAXISAFE is totally flexible. Its 3-sided slider allows for comfortable, variable handling.

At the press of a button
Your two hands alone are enough to change the blade. And these short instructions: press the blade change button and swing open the handle. Push the blade carrier to the front and you can change the blade. It's that easy.

Metal guard
SECUPRO MAXISAFE is not afraid of a little friction. A metal abrasion protection shield, found on the underside of the knife head, works to prevent any general wear and tear as you cut your path through the day.

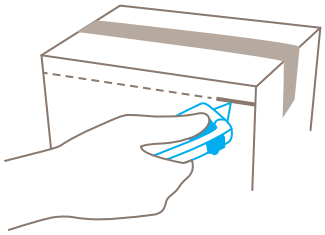

Double-edged blade
Don't change your blade the moment the tip turns blunt. Double the usage time of your blades and minimize wastage by always remembering to flip them over. Don't forget: there are two sides to every blade!

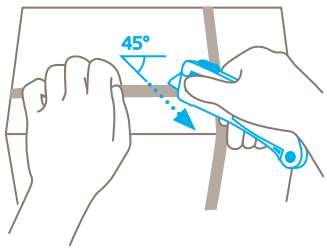

Small eyelet
No one likes to lose their tools. Especially not tools like the SECUPRO MAXISAFE. That's what the eyelet is for; to safely transport and/or tether your cutter.

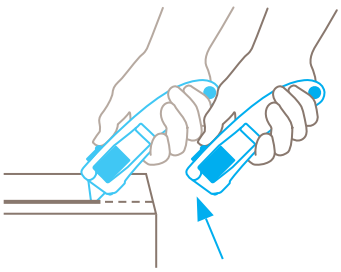

Maximum comfort. With a 3-slided slider.
Are you often only satisfied with the maximum? That connects you to the SECUPRO MAXISAFE, our safety cutter with the fully automatic blade retraction. Thanks to its large blade extension, it masters even 3-ply cardboard boxes - depending on the blade shape attached - but also all other materials such as carpets or foils, for example. It also provides maximum comfort, whether you are right or left handed. Another special feature: the rounded off blade tip.

Application

Safety technology

Fully automatic blade retraction – a very high degree of safety
The fully automatic blade retraction of the SECUPRO MAXISAFE guarantees a very high degree of safety from cut injuries. The blade withdraws into the handle the moment it leaves the material being cut. Even when the slider is being held forward.

PRODUCT FEATURES

Technical features

- Very high safety
- Tool-less blade change
